

FOR IMMEDIATE RELEASE

**EMISSION & POWER SOLUTIONS PRESENTING TO CLIMATE CHANGE THOUGHT LEADERS AND INDUSTRY LEADERS AT COP15 CONFERENCE IN COPENHAGEN; PRESIDENT OBAMA LIKELY TO ATTEND CONFERENCE**

LONDON, 17 November 2009

[Emission & Power Solutions, Plc](#) (“EPS”, “the Company”), a clean tech company, announced today that numerous thought leaders have approached the Company regarding the Company’s proprietary technology. The prestigious COP15 Climate Change Conference in Copenhagen, December 7<sup>th</sup> -18<sup>th</sup> will likely be attended by President Obama. British Prime Minister Gordon Brown and French President Nicolas Sarkozy are confirmed attendees. Numerous internationally recognized heads of state, ministers, foreign dignitaries and senior executives with responsibility for climate changes issues within industrial and commercial organizations will be in attendance and will be presented to the Company and get a presentation of its technologies. The Climate Action publication is available on UNEP's [website](#), the home page can be found at [www.climateactionprogramme.org](http://www.climateactionprogramme.org).

Erik Ulsteen, CEO & Chairman of EPS stated, “We have received tremendous interest from numerous attendees of the conference regarding our suite of products and their ability to reduce the carbon footprint along with improving fuel efficiency. We will have the opportunity to thoroughly present our technologies throughout the conference and we look forward to introducing many of these dignitaries to our products and their capabilities. We believe our sensor technology, which will work on all gasoline and diesel driven engines and can selectively detect and help reduce harmful environmental gasses, such as CO, NOx and CO2, will create a significant amount of interest.”

EPS recently went public on the Börse Frankfurt and trades under the symbol EPI (Yahoo Finance ticker: EPI.F, Bloomberg ticker: EPI:GR).

About EPS:

EPS is a “clean tech” company that licenses, acquires, develops, deploys, and transfers technologies dedicated to improving fuel economy while also reducing environmentally harmful exhaust emissions. Using advanced fuel treatment devices, EPS has developed a proprietary multi-phase process utilizing engineered flow patterns in order to restructure fuel hydrocarbons. This increases fuel efficiency and produces a cleaner burn during the engine’s combustion cycle. EPS has a portfolio of technologies in production and development and continues to expand its patented product line.

EPS’ primary product is the FX Reactor In Line Device that reduces fuel consumption, increases horsepower, and significantly reduces emissions. The FX Reactor is an aftermarket apparatus that can be added directly into the fuel

line of any diesel engine. EPS is also developing a Potentiometric Sensor that selectively detects and measures combustion gases, allowing for a further reduction in emissions and improved fuel efficiency. The third technology EPS is developing is an On Board Distillation System that vaporizes fuel in order to produce a cleaner engine start and reduce total hydrocarbon emissions.
