

FOR IMMEDIATE RELEASE

'CLEAN TECH COMPANY EMISSION & POWER SOLUTIONS LISTED ON
FRANKFURT EXCHANGE'

LONDON, 21 October 2009

Emission & Power Solutions, Plc ("EPS", "the Company") began trading on the Börse Frankfurt under the symbol EPI. Based on the opening day's price of €1.00, EPS has a market capitalization of approximately €24 million.

EPS is a "clean tech" company that licenses, acquires, develops, deploys, and transfers technologies dedicated to improving fuel economy while also reducing environmentally harmful exhaust emissions. Using advanced fuel treatment devices, EPS has developed a proprietary multi-phase process utilizing engineered flow patterns in order to restructure fuel hydrocarbons. This increases fuel efficiency and produces a cleaner burn during the engine's combustion cycle. EPS has a portfolio of technologies in production and development and continues to expand its patented product line.

EPS' primary product is the FX Reactor In Line Device that reduces fuel consumption, increases horsepower, and significantly reduces emissions. The FX Reactor is an aftermarket apparatus that can be added directly into the fuel line of any diesel engine. EPS is also developing a Potentiometric Sensor that selectively detects and measures combustion gases, allowing for a further reduction in emissions and improved fuel efficiency. The third technology EPS is developing is an On Board Distillation System that vaporizes fuel in order to produce a cleaner engine start and reduce total hydrocarbon emissions.

For more information about EPS and its technologies, please visit the Company website at www.epsaves.com.
