

FOR IMMEDIATE RELEASE

## **CLEAN TECH COMPANY EMISSION & POWER SOLUTIONS ANNOUNCES PURCHASE ORDER FOR FX REACTOR**

LONDON, 22 October 2009

[Emission & Power Solutions, Plc](#) (“EPS”, “the Company”) announced today that it has received a purchase order for its FX Reactors. Erik Ulsteen, CEO & Chairman of EPS stated, “We are very excited to receive this new order from our distributor, this order will service several new Fortune 500 customers. We believe additional orders will follow very soon. The order provides further validation of our technology and business model.” The Company will begin shipping the order immediately.

The FX Reactor is a proven and patented technology which provides revolutionary, onboard refinement of diesel fuel when installed on commercial diesel engines. The FX Reactor is proven to:

- Reduce Fuel Consumption by at least 3-5%
- Increase Horsepower
- Reduce Emissions
- Extend Engine Life

EPS recently went public on the Börse Frankfurt and trades under the symbol EPI (Yahoo Finance ticker: EPI.F, Bloomberg ticker: EPI:GR).

### About EPS:

EPS is a “clean tech” company that licenses, acquires, develops, deploys, and transfers technologies dedicated to improving fuel economy while also reducing environmentally harmful exhaust emissions. Using advanced fuel treatment devices, EPS has developed a proprietary multi-phase process utilizing engineered flow patterns in order to restructure fuel hydrocarbons. This increases fuel efficiency and produces a cleaner burn during the engine’s combustion cycle. EPS has a portfolio of technologies in production and development and continues to expand its patented product line.

EPS’ primary product is the FX Reactor In Line Device that reduces fuel consumption, increases horsepower, and significantly reduces emissions. The FX Reactor is an aftermarket apparatus that can be added directly into the fuel line of any diesel engine. EPS is also developing a Potentiometric Sensor that selectively detects and measures combustion gases, allowing for a further reduction in emissions and improved fuel efficiency. The third technology EPS is

developing is an On Board Distillation System that vaporizes fuel in order to produce a cleaner engine start and reduce total hydrocarbon emissions.
