Civil Constructors  
P.O. Box 685  
Franklin, TN 37065

Civil Constructors is a large company that does site preparation and utility and highway construction. We operate some 500 pieces of on and off-road equipment.

We conducted a demonstration of the FX Diesel Fuel Reactor on 2, 2006 Mac dump trucks with Renault engines. The first truck showed a good increase of 13.29% mpg and the second showed an exceptional increase of 26.41% mpg. This is an average of 19.85% in fuel savings.

Our fleet of some 500 vehicles and equipment use approximately 2.5 million dollars in fuel costs per year. At an estimated fleet average of 7-10% in fuel, the savings would equate to \$175,000.00 to \$250,000.00 per year. (These estimates are based on fuel at \$2.00 per gallon.)

We also look forward to the additional benefit of 14-21% reduction in emissions, 8-12% increase in power and a serious reduction in engine wear as the fuel is reprocessed to burn more completely.

We have now begun to equip our fleet with FX Diesel Reactors manufactured by Emissions and Power Solutions, Inc.
