

WHITE FARMS, AJV
701 Peyton Circle
Marks, MS 38646

November 18, 2008

I installed the units on my farm over 2 years ago. I have them on John Deere Power Units, Cummins Power Units and John Deere Tractors. I have seen amazing results. I have seen 13.5% in fuel savings and a 10-12% increase in horsepower.

On 100,000 gallons of fuel used on the farm, I have saved an average of 13,500 gallons of fuel. With the cost of fuel today you can see a tremendous savings.

Sincerely,

A handwritten signature in black ink, appearing to read "Gerald White". The signature is written in a cursive, flowing style.
