Independent School District 197

Eagan • Inver Grove Heights • Lilydale • Mendota • Mendota Heights • Sunfish Lake • West St. Paul

September 10, 2007

We tested 3 school buses with the Fuel FX Diesel Reactor on
1 1991 International 3800 with a 7.3 engine getting 8.84% better mileage.
1 2004 Navestar 3900 with a 444E engine getting 9.2% better mileage.
1 1996 International 3800 with a 444E engine getting 16.75% better mileage

The average for the three vehicles was 11.59%.

Our drivers also noticed a visual decrease in emissions and an increase in power as well as smoother running engines.

With a fleet average of 10% we would save \$23,000.00 per year on fuel costs. We have now decided to equip our entire fleet of 56 school buses.
