December 15, 2008

Mora Public Schools I.S.D. 332
400 Maple Avenue East
Mora, MN 55051

On September 1 of 2008, we signed a "Demonstration Agreement" to evaluate the effectiveness of the EPS FX Diesel Reactor on increasing the mileage on our school buses.

A 2006 International D.T. 466 improved from 6.59 MPG to 7.05 MPG for a 6.95% increase.

A 2003 International D.T. 466 improved from 6.94 MPG to 7.92 MPG for a 14.12% increase.

The average increase was 10.54%. We estimate a fleet average of 10%. We estimate that our fleet of 16 buses will save \$10,000.00 per year. As a result, we have decided to equip our fleet.

We also look forward to the reduction in emissions, increased power, and getting longer life with the buses running cooler with less engine wear.

Sincerely,

Gary Gauffin, Transportation Director
Mora Public Schools
