August and Mary Schuh, Jr.
To Bob Carl of Entech USA, Inc

Bob:

I've only driven the motor home from LaVergne, TN to St. Charles, MO and return since having the FX Diesel Reactor installed. The fuel mileage prior to installation was 7.4 mpg (according to the vehicle computer). After installation the fuel mileage increased to 8.0 mpg (according to the vehicle computer) which is an 8% increase in mileage.

I also noticed a marked increase in power (especially when climbing hills). The unit was installed in a 2000 Monaco Dynasty. The engine is a Cummins 350.

Thank you again for the FX Diesel Reactor and may God bless you in all you do for Him.

August Schuh
