6022 Charrington Drive
Spring, TX 77389

Dear Mr. Casey,

I am writing to give you some feedback about the FX Diesel fuel reactor that we attached to a few of our track hoe train unloading units (CAT 335's). The average increase of fuel savings at this point in time is around nine percent, almost doubling what we discussed. All three operators have noticed an increase in power and performance. TXI would like to thank you for bringing the product to our attention and we will let other TXI operations know of our success.

Thank you,

Bobby White
Maintenance Coordinator
