May 18, 2007

Wright Service Center, Inc.

We have tested the Fuel FX Diesel Reactor and have seen some excellent results on our Cat Dozer #133730 of +9.9 % and on our bucket truck, Chevy C6500 of +23 % GPH and +31 % MPG. This is an average of +16 %. We would base our fleet wide projection on a conservative +10 %. Granted we could do much better.

At 50 gallons per day average we would save \$275.00 per vehicle per month at \$2.50 a gallon of diesel. This will be a savings of \$27,500.00 per 100 vehicles per month. Our R.O.I. would be 3.25 months.

We are now in the process of equipping our fleet and have made the decision to become a dealer for Fuel FX International, Inc.
